University of Groningen

📅 September 2019 – January 2020 📍 Groningen

- Courses: Statistics for AI and CS (B.Sc), Pattern Recognition (M.Sc)

Assistant System Engineer

Tata Consultancy Services

📅 October 2016 – June 2018 📍 Mumbai

- Worked as SAP ABAP developer for an Indian Retail client
- Gained good exposure on Open SQL
- Optimized algorithms to reduce space and time complexity of programs that processed huge amount of data.

Course Instructor

Don Bosco Institute of Technology

📅 October 2015 – March 2016 📍 Mumbai

- Course: Linux Administration

PROJECTS

M.Sc Thesis: Open-ended 3D Object Recognition using Dynamically Expandable Networks 📄

University of Groningen

📅 March 2020 – Present 📍 Groningen

- A neural network model that can keep on learning to recognize new 3D object classes without catastrophically forgetting known ones.
- From the whole model, only a sub-network is trained that is responsible for the new output class. If overall performance decreases, the model is expanded dynamically and trained again.

Image Inpainting

University of Groningen

📅 April 2018 – June 2019 📍 Groningen

- Comparative study of cGAN and U-Net implemented to reconstruct missing parts of face images. Trained and tested these networks on a dataset of celebrity faces.

Comparing Reinforcement Learning Algorithms

University of Groningen

📅 November 2018 – January 2019 📍 Groningen

- Comparison between performances of CACLA and SPG Reinforcement Learning algorithms on BipedalWalker-v2 environment from OpenAI Gym platform.

Handwriting Recognition

University of Groningen

📅 April 2019 – June 2019 📍 Groningen

- Automated handwriting recognition system for Hebrew scripts.
- System pipeline performs pre-processing, segmenting lines/words, training classifier, and creating text files with predictions.
